SEABROOK NURSERIES GLADIOLUS

GREETINGS

Again, we wish to thank our many friends and customers who helped in the success we have achieved this past season. We will strive to give both new and old customers the same excellent quality stock and service, as in the past, during the coming year. Thanks, too, for the many 1937 letters of appreciation we received.

Although a shortage exists of many gladiolus bulbs, at the present writing, we have a very good supply of the many fine exhibition, decorative and primulinus types herein listed. All of these varieties are well worth trying.

We have massive gardens, consisting of many acres of gladiolus, blooms from July 15th until frost. Visitors are cordially invited to enjoy this spectacle.

Location is on the U. S. Route 1, the main highway to Portsmouth, N. H. six miles from Newburyport, Mass.

Sincerely,

SEABROOK NURSERIES,

SEABROOK, N. H.

CARE AND CULTURE OF GLADIOLUS

BULBS should not be planted until corn planting time, as nothing is gained by planting before the ground is warm.

Select a sunny location away from the roots of trees and shrubs. In localities where summer is extremely warm, a partially shaded situation is preferable. If your soil is heavy, plant four inches deep and if light, six inches, having bulbs five or six inches apart.

Place bulbs in a well worked trench in staggered or zigzag row— . . . and cover at first with about two inches of loam; when shoots begin to appear, work balance of loam into the trench. At all times keep the soil loose. As an aid to producing larger blooms work in fertilizer around the plants when about a foot or more in height and never at planting time. At the time flower spikes appear abundant watering is very beneficial.

Bulbs should be dug as soon as you note the leaves turning yellow. Cut stem off half an inch above bulb, spread them out to dry for two or three days in a sunny location and then place in an open shed or room for two weeks or more before storing them away in a cool dry cellar. Keep them spread out and not over three inches deep. It is a benefit to give bulbs an occasional sunning or airing during the winter.

When cutting the flowers be sure to leave at least four leaves remaining on the plant. Positive injury to the blooming qualities of the bulbs for the following year will occur if this precaution is not heeded.

If you want the blooms for cut flowers, cut the spike when first bud fully opens. The remaining buds will open nicely and give you a longer period of bloom and greater enjoyment.

Remove wilted blossoms, change water and cut off small portion of the stems each day.

CONTROL OF THRIp

Do not throw Thrip infested bulbs away. Treat with Napthalene Flakes or a disinfectant. This insect can be carried on clothing, from one field to another by birds, high winds or in bouquets. Many a bulb is perfectly clean when planted, yet in some manner contracts Thrip before season is over.

Thrip are black and cream, 1-16 inch long and live in the folded gladiolus leaves. Sometimes they can be detected by the silvery sheen on leaves, although many times discovery is too late and the buds do not open, as the insect has extracted all juice from them previously.

When plants are about four inches tall and thrip is found, it is best to use a solution of the following as a weekly spray. One rounded tablespoon of Paris green, two pounds of brown sugar and three gallons of water well mixed. If a stronger solution is desired, which is harmless, use two tablespoons of Paris green instead of one, to the same mixture. Some have substituted cheap molasses in place of brown sugar, which is good. The solution must get into the folded leaves to be effective.

If discovery is made too late, it is best to cut tops off, about six inches from ground and burn them, allow bulbs to stay in ground until digging time. The above spray can be used on remaining stalk to kill anything which might be left.

Dig, clean and dry bulbs in usual manner. Place thoroughly dry bulbs in boxes, heavy paper bags or receptacles. Sprinkle Napthalene Flakes at the rate of 1 pound to 1000 bulbs or 1 ounce to 100 corms over bulbs. Immediately cover receptacles with heavy paper or tie heavy paper bags at top to confine fumes. Keep bulbs at temperature of about 60 degrees for three weeks. Then shake off flakes and store bulbs in dry place, uncovered, at 40-50 degrees for winter.

Bichloride of Mercury can be used to disinfect in proportion of 1 ounce to 8 gallons of water, or 10-5 grain tablets to gallon water, or if only a small amount of bulbs use 1-5 grain tablet to 1 pint water, soaking bulbs in solution for 3 hours. If many varieties to soak at same time, place them in sugar, salt or net bags, labelling each variety, using little wood labels. A waterproof pencil can be used on the labels for marking.

Pass this information along to your neighbors and friends who are lovers of gladiolus that they, too, may help destroy this pest.

MIXTURES

We have long been noted for the excellence of our mixtures, stating, with reasonable assurance, that there are but few growers able to offer as varied and choice assortments such as we assemble. The bulbs are all $1\frac{1}{4}$ inches and over, and not the medium bulbs 1 inch or smaller, such as many offer at even greater prices. If you want medium bulbs, pay only what you should.

GARDEN MIXTURE

Composing many fine varieties, all colors. Splendid for a gorgeous garden display or flowers for cutting. \$2.00 per hundred, fifty for \$1.00 or 25c a dozen. Medium bulbs \$1.25 per hundred.

PRIMULINUS MIXTURE

For daintiness and quality, there is nothing that can equal our Primulinus Hybrids. For table or interior decorating, they are unsurpassed. \$3.00 per hundred, fifty for \$1.50 or 50c doz. Medium bulbs \$1.50 per hundred.

OUR SEABROOK MIXTURE

Exhibition Types

Made up of a large number of very choice varieties of superior merit. If bought under name the bulbs would cost many times the price asked. \$4.00 per hundred, \$2.00 for fifty, 60c doz. Medium bulbs \$3.00 per hundred.

DELUXE COLLECTION

To satisfy the demand for a mixture containing the choicest varieties that it would be possible to buy for a reasonable price, we offer this collection with the assurance given that you will be agreeably surprised at the wonderful value. Every bulb that is put into this collection is from a variety of the finest exhibition type and collection well balanced as to colors. \$8.00 per hundred, \$4.00 for fifty, \$2.00 for twenty-five. Medium bulbs, \$5.00 per hundred.

COLOR COLLECTION

Ten large bulbs, each color labeled, 100 bulbs in all, Yellow, Red, Pink, Cream, Salmon, Lavender, White, Purple, Orange and Old Rose. These are put up in three grades, \$2.00, \$4.00 and \$8.00. We can assemble these also in packages of 5 each at half price.

IRIS

We have numerous varieties not labeled that can only be sold in mixtures. All good sorts in a varied collection, \$1.00 dozen. Try a dozen or more.
